

## Support for Geoscience Educators

As an educator (a teacher of biology, chemistry, physics, environmental science, geology or geography), would you like the opportunity to:

- Update your subject knowledge in Earth/Geoscience?
- Get fresh ideas for practical ways to teach your subjects?
- Network with fellow teachers from around the world?
- Be invigorated by hearing and seeing presentations from leading scientists in the geosciences?

Then you should think about attending the GIFT workshop (Geoscience Information for Teachers) at the next EGU General Assembly, 14 – 17 April 2024 in Vienna, Austria.

Thanks to continued and generous support from the European Geoscience Union (EGU) applications are highly (usually fully) subsidised for this high-quality CPD opportunity. The application window is open during October and November to apply to attend GIFT 2024.

The workshop theme is “The changing climate of our Planet”

More details inc. how to apply can be found at [www.egu.eu/education/gift](http://www.egu.eu/education/gift)
